

ABOUT FELTON CCOR™

CLIENT-CENTERED

OUTCOMES

RESEARCH

Developed in 2016, Felton CCOR™ (*see-core*) aspires to provide exceptional training and technical assistance to mental health providers and organizations to leverage their experience in the service of innovation, health equity, and sustainable impact.

As a public mental health-focused training and technical assistance resource, Felton CCOR™ grounds its work in the belief that stakeholder and community insights are fundamental for transformative change. At the forefront of CCOR's work is the intersection of culture/race/ethnicity, social adversity, and access to quality services.

EARLY PSYCHOSIS

Training & Technical Assistance

what you need to know about

FOCUS AREAS

- ✓ Training Materials
- ✓ Past Consulting

CCOR™ SERVICES

Felton CCOR™ partners across the public and private sectors, developing organizations and improving capacity for mental health services implementation, providing training and education on specialized mental health approaches, as well as technical assistance and resources for the sustainability of our community partners.

CCOR™ works hand in hand with Felton Institute's award-winning programs and training and technical assistance initiatives throughout California and across the United States.

FOCUS AREAS

- Youth & client outreach & engagement;
- Program implementation, improvement and innovation within early psychosis treatment programs;
- Infrastructure building and staff capacity development to support high-quality performance monitoring and data collection, in mental health organizations.

PAST CONSULTING

Felton CCOR™ provides training, consultation and rigorous needs assessments for organizations to implement early psychosis coordinated specialty care.

Past and current partners include:

- National Association of State Mental Health Program Directors (NASMHPD)
- National Council on Behavioral Health
- National Association on Mental Illness (NAMI)
- Cenpatico, Southern Arizona
