

CHILDREN SERVED: BIRTH TO AGE 5

In partnership with families, we provide a community in which all children entrusted in our care are safe, valued and receive individualized learning opportunities to support the abilities and skills of the whole child allowing them and their families to reach their full potential for success as lifelong learners.

We provide responsive developmental early care and education and family support services in an equitable, nurturing, challenging and inclusive environment that addresses the medical, social and educational needs of the child and family, thereby helping them develop a solid foundation for lifelong development, family economic success and hope for a successful future.
